

Bitesize data science for our *hi!* SUPERGirls

**Analyze your day with your beloved ones (family/friends)**

The donut graph shown below represents the distribution of someone's daily activities.

- 1. In the table below, mention your typical weekday activities, the number of hours spent on each activity, and the percentage of each activity. Be sure to include all daily activities and basic living requirements such as sleeping.**

Activity	Number of hours spent	%

- 2. Create your typical weekday donut graph for yourself. Be sure to include all daily activities and basic living requirements such as sleeping.**
